

PROJECT BRIEF

WestConnex M5 Secondary Steelwork & Fire Panelling

Brolton Group was awarded the contract to supply and install the secondary steelwork and fire panelling for the new WestConnex M5 tunnel at St Peters Interchange, Bexely, Kingsgrove and Arncliffe.

- Works included: manufacture drawings, fabrication, testing and installation of the steelwork and fire panels
- Limited access to the tunnel required detailed planning of the installation work fronts
- The fire panels were pre-processed in-house using Brolton's Techni i510-G2 water jet cutter
- Approximately 175 tonnes of structural steel and 1300m² of fire panelling
